## HEART SCREENING AT WACHUSETT, JUNE 15, 2013

Heart Screening is devised to detect certain heart conditions that cause sudden cardiac arrest. Age group most affected is between 10-19.

Because right now we only have two pedi. Cardiologists, it looks like we will only be able to screen around 150 students. For this reason, we will probably have screening be for students at high school only- for this year

We need EMT's, more nurses, and MORE DOCS!!!

Where we need help:

Set up night before...will have large tents to set up, and tables (will need to borrow white- plastic type tables). Signs, tables for food, etc...TAKE DOWN

Organizing DONATIONS (hopefully) in way of breakfast and lunch foods for volunteers...some may be here from 7 am- 5 pm..

Stations (want leader)

Check in

Volunteer check in coordinator (will be very busy)

Bp station

Heart sounds

Ecg

Cpr/aed station (Eric?, contacts with Chief Chandler and/or Dave Russo)

Physician consult area- echo area

Check out station

WILL HOPEFULLY HAVE GET TOGETHER FOR VOLUNTEERS AT VALS OR SOMEWHERE CLOSE...
