

# The Extinguisher

**DEPARTMENT  
UPDATES  
6/16/23 -6/130/23**

**On behalf of the department, we would like to wish everyone a safe and happy Independence Day. It is officially summer, so enjoy the weather and any upcoming vacations as we don't really get a very long time to do so. Please remember that during this season, the department still needs members to respond to callbacks for incidents so if you are available we would love to see you.**

## Personnel

- 1. FF Adam Roy will begin his career with the department on 7/5 at 07:00. He has been assigned to the Day Impact 2 shift schedule and the ePro schedule has been updated to reflect this. Many of you know Adam but if you don't, please welcome him to the department.**
- 2. Schedule Alert!!! – Holden Days will take place this year on 8/26. We will be taking part as in the past with apparatus and SAFE displays. Anyone who has any fresh ideas to make our displays better please let me know. Mark your calendars early and come in for a fun day!**

## Vehicles

- 1. Car 3 – In the process of mounting tools and equipment. It will be going back to McGovern for some cosmetic repairs to the lettering.**
- 2. Car 5 – Has been delivered and is awaiting the registration and new plates. It will be going through the process of mounting equipment prior to being in service. The CERT van is out of service and should not be used under any circumstance from this point forward.**
- 3. Ambulance 4 – The ambulance is due to be shipped today to Greenwood Emergency Vehicles. It will still have some upfit to be done by the dealer prior to delivery.**
- 4. Engine 4 – The front intake has been repaired.**

## **Equipment**

- 1. After the brush fire on Princeton Street and the difficulty in finding the seat of the fire, the department has purchased our own drone. It has been delivered and we will be looking at training and licensing members so that we have more than one person who can deploy it.**
- 2. With the start of the new fiscal year, we will be converting the bubbler in the back hallway of Fire HQ over to a water bottle fill station. This will allow our members to fill water bottles at any time rather than using the rehab water. The department has ordered each member a department issued Camelbak water bottle for hydration to go along with the fill station. Hopefully they will be in shortly.**
